

`/home/niklas/workspace/fbgui/src/javascriptinterface.h`

```
graph BT; A["/home/niklas/workspace/fbgui/src/javascriptinterface.h"]; B["/home/niklas/workspace/fbgui/src/fbgui.cpp"]; C["/home/niklas/workspace/fbgui/src/javascriptinterface.cpp"]; B --> A; C --> A;
```

The diagram illustrates a dependency relationship between source files and a header file. At the top, a grey-shaded box contains the path `/home/niklas/workspace/fbgui/src/javascriptinterface.h`. Below it, two white boxes with black borders contain the paths `/home/niklas/workspace/fbgui/src/fbgui.cpp` (left) and `/home/niklas/workspace/fbgui/src/javascriptinterface.cpp` (right). Two blue arrows point from the bottom of each source file box towards the header file box, indicating that both source files include or depend on the header file.

`/home/niklas/workspace/fbgui/src/fbgui.cpp`
